#### **DETAILED ACTION**

#### Election/Restrictions

- 1. Claims 1 and 5-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 5.
- 2. This application contains claims 1 and 5-19 drawn to an invention nonelected with traverse in Paper No. 5. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

## **Drawings**

3. This application lacks formal drawings. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings.

### Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 ends at P.43,ln.18 with the period thereat and claim 3 appears to begin on (p.43,ln.19), however, on p.44,ln.18 there is presented what appears to be a second claim 3 but the previous claim 3 after the period on p.43,ln.18 does not definitely end as there is no period "." on (p.44,ln.17).

Claim 2 causes confusion with respect to the purpose of the claim limitations when taken together with the purpose being for use in monitoring of telephone communications ((ln.11-12, p.43) as there is no clear monitoring provided via the limitations presented.

Application Number: 09/516,381

Art Unit: 2645

Claim 3 recites the limitations "the digital call" (p.43,ln.20), "the group various languages" (p.44,ln.2-3), "the word" (p.44,ln.2), "the call" (p.44,ln.13), and "the response" (p.44,ln.17), there is insufficient antecedent basis for these limitations in this claim.

Various definitions for the multiple abbreviations are not supplied in the claims, GUI, VDD, DG.

Claim 3 causes confusion with respect to "a digital data pack" (p.43,ln.20) containing 'the digital call' as it is not clear if this is intended to refer to the voice signals which have been converted in claim 2.

Claim 3 causes confusion (p.44,ln.2-3) with respect to 'in a desired range of timing and frequency from the group of various languages' as there appears to be no relation to anything related to the claim limitations previously presented and it is unclear what this intends to refer to.

Claim 4 causes confusion with respect to "the data" as it is not clear what data is definitely being referred to, further "would be" is indefinite in that it is not clear that the encoding is or is not making the data "unalterable without modification of the data".

#### Conclusion

- 6. The patentability of claim 2-4 can not be determined at this time due to the confusion noted above with respect thereto.
- 7. The prior art made of record and not relied on is considered pertinent to the claimed invention, all references previously made of record in the parent application should be made of record by applicant as they are considered to be known thereto.
- 8. Any response to this final action should be mailed to:
